

IBM PROJACS – Project Analysis and Control System

PROJACS was a System/370 mainframe project management software package, designed to aid management fulfil its responsibilities in the planning and controlling of projects using the critical path method. It consisted of:

PROJACS DOS/VS (5746-XP1)
PROJACS OS/VS (5740-XP1)

S/370 Software prices:

Project Analysis and Control System (PROJACS):

	Monthly rental USD
OS/VS	231
DOS/VS	231
Main Processor	105
Resource Allocation	52
Network Preparation	52
