

# Hursley Museum Services – March 2021

## Current Activities

The Hursley site remains closed. Curators have been able to provide historical data for Tony Cleaver's (5 minute!!) slot at the Royal Society bash. His talk is scheduled to cover John Fairclough, ATM and rotary disk actuator. Peter S is working through 10 years' worth of soft copy photos and documents collected in the last 10 years into some semblance of order and usability.
